

PART TWO

accomplishments in Sri Lanka

The following pages illustrate and describe the results achieved by each project in the General Programme.

This chapter is arranged like a trip along the island's coastline, starting from the south, continuing to the southeast and the northeast, and finally arriving at Colombo, Sri Lanka's capital. The projects completed in these four areas are preceded by a brief description of the context in which the Department and other actuators had to work and are followed by a photo gallery describing aspects and instances of everything that was done.

In the final chapter – “Colombo and the West Coast” – we brought together not only the projects pertaining to that area but also those carried out directly by the Department and by our partners in collaboration with the central agencies or ministries of the Sri Lankan government for supplies intended for various areas around the country.
